

Saturnino H. Mejia
Assistant General Manager, Special Projects Group

AGM Saturnino oversees the functions of the Special Projects Group, that of developing new businesses in joint venture with the private sector or another government corporation, conducting project evaluation, due diligence and detailed analysis of the viability, technical feasibility, economic and social desirability of projects.

He builds up strategic alliances, develops and establishes domestic and international linkages with prospective investment partners.

With a solid experience in joint venture undertakings, corporate finance, project evaluation and management, feasibility study preparation, public-private partnerships, macroeconomic analyses, Saturnino promotes investments in the areas of renewable energy, industrial estate development, food terminal complex, decontamination of agri and non-agri product, health and technology innovations.

He holds a Master of Science in Policy Science (*Monbusho Scholarship Grant*), from the International Graduate School of Policy Science, Saitama University, Japan and a Master of Science in Industrial Economics (*Completed all required academic units; Hans Seidel Scholarship*) from the Center for Research and Communication (CRC)

He earned his Bachelor of Science in Management Engineering degree from the Ateneo de Manila University.
